INCIDENT PLANNING, PREVENTION, DETECTION, RESPONSE, RECOVERY

With cyber attacks accelerating at an alarming rate, you can help your clients stay cyber safe by tapping top cyber industry experts. With proven security programs, our experts work under your direction to help defend your clients' data and businesses.

CYBER as a SERVICE

<u>NEW</u> Subscription Based Program to proactively secure your environment:

✓ Development of a security program

✓ Risk assessments to specific cybersecurity frameworks of client's choosing

✓ Cyber Tracking Software

✓ Tabletop simulations

✓ Run books (process guides for incident response)

✓ Discount on Incident Responder rates

✓ Service Level Agreement on response times

The MCPc Cyber Security Leadership Team brings a wealth of knowledge and expertise. With over two hundred years of law enforcement, FBI, CIA, Fortune 50/500, and large mid-market experience, we have the consulting and critical infrastructure cyber security creds to provide you with scalable, comprehensive, yet practical cyber security solutions for your clients.

While no organization and no cyber security program can be completely immune from compromise, MCPc's "Continuum of Care" provides the highest level of assurance that your clients most critical assets are adequately protected from theft or attack.
